MARCO TECHNOLOGIES

AI RFP ANALYST · BUILT FOR TRADE CONTRACTORS

Meet Eva.

From RFP to proposal, in one conversation.

She reads the specs and the drawings, makes the bid call, and drafts the estimate and proposal. You just ask.

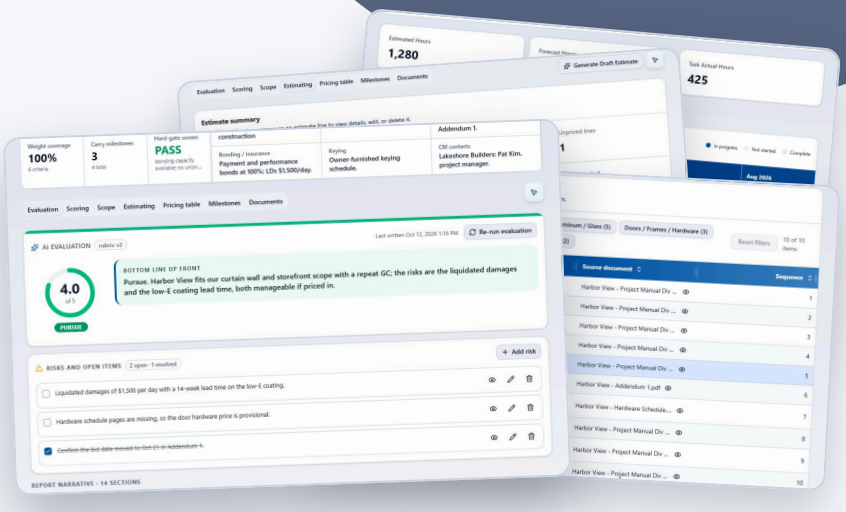

ONE UPLOAD

Bid to build.

Drop in the RFP. Eva scores it, pulls the scope and drafts the estimate and proposal. Olivia takes the win from there.

You: "Eva, do we bid Harbor View?"
Eva: "Yes. Four out of five. Pursue."

What Eva does

01 Reads every page
Specs, addenda and the drawings. Door and window schedules come straight off the sheets.

02 Calls bid or no-bid
Scored on your own rubric: Pursue, Conditional or Do Not Bid, with a report of up to 14 sections.

03 Extracts the scope
Scope lines split by who supplies them, each traced to its source document.

04 Drafts the estimate
Built from your price book, with unpriced lines flagged. A placeholder, not a quote.

05 Drafts the proposal
A draft proposal document, generated from the same upload and ready for your review.

06 Hands off the win
Won bids become projects. Olivia plans tasks, milestones and crew capacity.

Most tools do one piece. Eva does the whole chain.

Response tools	Scoring tools	Quoting tools	Planning tools	Eva + Olivia
write proposals	qualify bids	price the work	schedule crews	the whole chain

Runs in your Microsoft 365. Your pricing stays in your tenant.
No third-party platform. Set up and managed by Marco Technologies.
